-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 7 and 8, filed December 15, 2004, with respect to the rejection(s) of claim(s) 1-6 under 35 USC 102 as being anticipated by Shank, Jr. have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Keller and Suzuki et al.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-9 rejected under 35 U.S.C. 103(a) as being unpatentable over Keller (5,582,537) in view of Suzuki et al. (6,099,391).

Keller discloses an apparatus for sand-blasting the inner walls of bores. The apparatus of Keller anticipates the blasting apparatus as presently claimed, however, Keller does not go into the supply, or feed of the blasting medium. Suzuki et al. also disclose a blasting apparatus. Regarding the issue of the supply of the blast medium, Suzuki et al. teach that the blasting medium supply includes a storage container 180, a metering device 184, which includes a control means, and a flowmeter 188 for measurement of a mass flow of the blasting medium. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to

have modified the blasting apparatus of Keller, by providing a blasting medium supply control, such as that taught by Suzuki et al., in order to accurately control the delivery of the blasting medium and to produce the desired jet at the outlet.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David B. Thomas whose telephone number is (571) 272-4497. The examiner can normally be reached on 7-4 M-F.
